

'Quest for a Cure: Liver Cancer' Wednesday, September 18, 2024 • 5 - 7 p.m. University of Hawai'i Cancer Center • Sullivan Conference Center

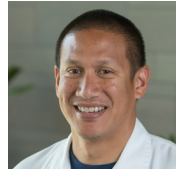

Through "Quest for a Cure", we aim to involve and engage anyone whose life has been touched by cancer and wants to learn more about the disease. Our speakers will review the impact of liver cancer in Hawai'i; symptoms; and treatment options such as surgery, locoregional therapies, chemotherapy, immunotherapy and radiation. In addition, liver cancer research currently being done at the University of Hawai'i Cancer Center, and a perspective from a liver cancer survivor, will be shared. Light refreshments will be served for those attending in person.
